

# Introducing GET.transform

The development goals formulated in the Agenda 2030 and the Paris Climate Agreement call for a **Global Energy Transformation**. The programme **GET.transform** addresses this challenge by assisting developing and emerging countries worldwide in advancing their energy sector transformations.

To this end, the programme offers comprehensive advisory services to support energy sector transformations and create the necessary environment for large-scale clean energy investments. GET.transform is a **European multi-donor programme** with forthcoming support from the European Union, Germany, Sweden, the Netherlands, and Austria. The programme is part of GET.pro (Global Energy Transformation Programme).

## SERVICES

GET.transform provides advisory services on the following topics:

### Integrated energy and climate planning

- Long- and medium-term planning for a low carbon energy mix
- Integration of sectors: energy, climate, transport, etc.
- Regional harmonisation and standardisation

### Integration of renewable energy

- Grid integration of growing renewable energy shares
- System operation and flexibilisation
- Technical standards (e.g. grid codes)

### Decentralised renewable energy

- Rural electrification planning (integrated within national planning)
- Mini-grid based solutions (tenders, financing mechanisms, productive use, etc.)
- Operations and monitoring

## GET.transform in a Nutshell

European multi-donor programme

Beneficiaries: **public sector institutions**

Programme duration: **04/2018–09/2021**

GET.transform is implemented by GIZ and will be supported by

© GIZ / Michael Netzhammer

© GIZ / Sumi Teufel

## APPROACH

GET.transform operates **globally** and offers its services to selected high-impact countries in **Africa, Latin America** and **Asia**. At the same time, the programme will work with selected regional institutions to harmonise and mainstream its activities across these countries.

Implementation takes place in close cooperation with national and regional partners (energy ministries, utilities, regulators, and regional and inter-continental institutions), as well as renowned international organisations and research institutions.

GET.transform pays specific attention to integrating **gender considerations** in every aspect of its work.

## VALUE ADDED

As a programme operating worldwide, GET.transform provides the following added value to its partners:

- **Flexible advisory services** provided at short notice.
- Proven '**standardised**' **products and tools** which can easily **be adapted to specific country contexts**.
- Contacts to local partners on the ground and to a wide **network** of international institutions.
- **Exchange** of know-how and lessons learnt.

GET.transform draws on the experience of the former programme EUEI PDF which provided energy policy advisory for 13 years in more than 35 countries.
