

Introducing GET.transform

GET.transform is a technical assistance programme supporting national and regional partners and institutions in advancing their energy transitions. The programme is co-funded by the European Union, Germany, Norway, the Netherlands, Sweden and Austria.

GET.transform in a Nutshell

European multi-donor programme

Beneficiaries: public sector institutions

Focus regions: Africa, Latin America and the Caribbean

THE CHALLENGE

Achieving net zero requires the power sector to deliver around 60% of global energy-related CO₂ emission reductions. This transition must go hand in hand with closing energy access gaps through both utility-scale and decentralised **green and clean energy** solutions.

While the need for **power sector transformations** is widely recognised, the institutional, regulatory, and technical environment to initiate change and trigger investment is often limited or yet to be built.

THE APPROACH

GET.transform supports power sector transformation by placing **regulatory reform** and capacity development at the centre of change. The programme strengthens **frameworks and professional skills**, enabling institutions to design and implement effective policies that foster a **conducive investment climate** leading to a pipeline of bankable clean energy projects.

Operating globally with a focus on **Africa and Latin America and the Caribbean (LAC)**, the programme uses a systematic approach in advancing power sector transformations with national or regional partners:

- Targeted advisory services addressing key energy transition challenges
- **Scaling-up** and mainstreaming **country and regional best practices**
- **Cost-efficient implementation** through standardised approaches

GET.transform is co-funded by

FAST-TRACKING PROGRESS THROUGH TARGETED COLLABORATION

GET.transform combines flexible resources with expertise in **long-term energy planning, on- and off-grid regulation, market development and renewable energy grid integration**. Working with public-sector partners like energy ministries, regulatory bodies, power utilities and regional organisations, the **Team Europe** initiative advances equal partnerships and helps strengthening policies and regulations that unlock private investment in sustainable energy solutions.

Aligned with leading initiatives like the African Union’s **Agenda 2063**, the EU’s **Global Gateway** and its 360° Approach, and **Mission 300**, GET.transform accelerates the transition towards more sustainable power systems. Its modular design and strong emphasis on collaboration ensure that support is complementary, demand-driven, and grounded in **global best practice** — while building local capacity and developing the expertise needed for **long-term impact**.

PORTFOLIO AND RESULTS

In-Depth Country Support 		Regional Capacity Building 		Impact 
working in partnership with	Energy Ministries Electricity Regulators Utilities Power System Operators in 13 countries	contributing to key initiatives	PRLN with 12 electricity regulators AfSEM / CMP with 5 African Power Pools FOREPLEN with energy planners from 15 countries in LAC POLICY CATALYST with energy sector officials from 14 countries in Africa	New policies and regulatory frameworks adopted in several countries. Including predecessor programme, more than +50 policies and frameworks have been supported.
	Spotlight Successfully piloting a new variable renewable energy (vRE) forecasting framework with the power system operator (COES) in Peru .		Spotlight The Peer Review and Learning Network (PRLN) , a three-year exchange of best practices among African regulator CEOs, has promoted continental harmonisation efforts, leadership capacities and accelerated the roll-out of new electricity regulation.	Spotlight An unlocked potential to build 3,500 mini-grids and invest about EUR 400 million in Uganda and Mozambique.
